## COVER PHOTO . . . .

Mr. Arthur Hill standing beside a specimen of Fastigate Scotch Pine (*Pinus Sylvestris Fastigiata*).

This pine was planted in this location as a 30 inch plant in 1944 —photo in 1948.

We are organizing production of this splendid bluish-green pine as rapidly as possible with the view to offering it in limited quantities in the near future.

It is interesting to note that the specimen in this photo has never been trimmed and in 1956 is nearly 30 feet high and not over 24 inches wide. Coarse, heavy bluish needles are retained right to the bottom of the stem.
